CONTROL STICK FUNCTION

The Nintendo 64™ Controller contains a Control Stick which uses an Analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press **START** while holding the **L** and **R** buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

STARTING THE GAME

1. Turn OFF the power switch on your Nintendo 64™ Control Deck.

WARNING: Never try to insert or remove a Game Pak when the power is ON.

2. Make sure a Controller is plugged into controller socket 1 on the Control Deck.

If you're playing against a friend, plug the other Controller into controller socket 2.

3. Insert the Game Pak into the slot on the Control Deck. Press firmly to lock the Game Pak in place.
4. Turn ON the power switch. The EA SPORTS™ and FIFA™ logos appear. If you don't see them, begin again at step 1.

COMMAND SUMMARY

CONTROL SETS

FIFA Soccer 64 features two control sets for navigating the action: Simple and Complex. Actions not available in the Simple control set are labeled N/A. To configure your control set, see *Controller Select Screen* on p. 21.

- ❑ The Control Stick and Control Pad serve the same functions in *FIFA Soccer 64*; however, this manual refers only to the Control Pad.
- ❑ When a player is in possession of the ball, the Control Pad moves the player relative to the camera view.
- ❑ When the player releases a shot, he continues in the same direction, and the Control Pad directs the ball relative to the net.

ORGANIZING A MATCH

The first step to organizing a *FIFA Soccer 64* football match is deciding which type of game you'd like to play: Friendly, League, Tournament, or Playoff. When you make a match selection, the appropriate setup screen appears.

FRIENDLY MODE

Contrary to what the name may imply, a Friendly match is just as competitive as a final round Playoff meeting. Even when there's nothing on the line, no one likes to lose! You can match up your two favorite squads regardless of league, or pit a club against itself for a truly balanced contest of football skills.

- ☐ When you choose FRIENDLY from the Match Select screen, the Team Select screen appears.

TEAM SELECT SCREEN

Select the two teams you want to battle it out on the pitch. Each league features between 18 and 64 teams from which to choose.

- When you've selected the teams you want, press **A** or **START**. The Controller Select screen appears. See *Controller Select Screen* on p. 21.

LEAGUE MODE

The length of a League schedule depends upon the league you choose to enter. In League play, each team faces every other team twice—once at home and once on the road. You can choose one team and challenge for the Season title, or control up to eight clubs to play a greater role in the day-to-day action.

- ☐ When you choose LEAGUE from the Match Select screen, the League Select screen appears.

Note: A Controller Pak is required to save League data. If you do not have a Controller Pak, a text box appears asking if you want to continue.

LEAGUE SELECT SCREEN

Because the number of Season matches depends upon the number of clubs in the league, the choice you make here determines the length of your schedule. For a listing of the teams in each league, see

League Members on p. 32. The International league is the largest, boasting 64 teams from around the world.

Control Pad ← → to cycle leagues

- When the league you want is displayed, press **A** or **START**. The Team Select screen appears.

TEAM SELECT SCREEN

The Team Select screen displays all the teams that make up your league. You can select up to eight squads to control during Season play.

Indicates user-controlled team

- To select a team, highlight it and press **B**; a ✓ appears. To deselect a team, highlight it again and press **B**.
- When you've selected the team(s) you want, press **A** or **START**. The Standings screen appears.

STANDINGS

The Standings screen tracks Points, Games, Wins, Losses, Draws, Goals For, Goals Against throughout the Season. User-controlled teams are highlighted, making it easy to keep tabs on your team's performance.

Press **B** to go to the Scoring Leaders screen

- To advance to the Schedule screen, press **A** or **START**.

SCORING LEADERS

The Scoring Leaders screen gives you a quick update on the league's top-nine offensive players.

| Player | Team | Goals |
|--------------|-------------|-------|
| 1. Steve | Seabreeze | 12 |
| 2. Winton | Zambis | 10 |
| 3. John | Chino | 8 |
| 4. Steve | Winton | 6 |
| 5. Chino | Seabreeze | 4 |
| 6. Cambridge | Brawl | 3 |
| 7. Seabreeze | Amigos | 2 |
| 8. John | Winton | 1 |
| 9. Seabreeze | J. P. Pines | 0 |

Press **START** to return to the Standings screen

SCHEDULE SCREEN

The Schedule screen displays the upcoming schedule for each user-controlled team and records the results of all completed games. Each match is numbered, and must be played in numerical order. The computer automatically simulates any non-user matches scheduled before your next game.

Control Pad ←→
to scroll user-
controlled teams

Control Pad ↑↓
to scroll
schedule/results

- To begin your next match, press **A** or **START**. The Controller Select screen appears. See *Controller Select Screen* on p. 21.
- To take a break from the grueling action, press **B** to simulate your next match. This simulates the score as well as the stats. After each simulation, you are prompted to save your current position. See *Saving and Restoring* p. 31.

END OF THE SEASON

The number in the Points column on the Standings screen determines a team's position for the Season points title. Points are awarded as follows: Win-3 pts., Draw-1 pt., Loss-0 pts.

- ☐ As the Season draws on, the Schedule screen informs you if any of your teams are mathematically eliminated from the Season points title.
- ☐ At the end of the Season, the Schedule screen displays the points champion.

TOURNAMENT MODE

Tournament mode follows the format of most FIFA sanctioned tournament and cup challenges. The computer automatically divides league teams into qualifying groups. Rather than face every team in the league, you go up against only those teams that share your grouping, and teams meet just once.

You can choose one team and challenge for a Playoff berth, or control up to eight clubs to play a greater role in the cup challenge. The total amount of teams in a group is always larger than the amount of teams you control.

- ☐ Select your League and Team(s), and begin play exactly as in League mode. See *League Select Screen* on p. 16.

END OF THE TOURNAMENT

The number in the Points column on the Standings screen determines a team's position in the Playoff race. Points are awarded as follows: Win—3 pts., Draw—1 pt., Loss—0 pts.

Following the final Tournament match, the Schedule screen informs you whether or not the teams you controlled qualified for the Playoffs.

- ☐ If one or more teams you control qualify for the Playoffs, you advance to the Playoff Tree. Each team is seeded and placed in a single-elimination championship-style bracket. See *Playoff Tree* on p. 21.
- ☐ If all your teams are out of Playoff contention, the Tournament is over.

PLAYOFF MODE

Playoffs are the pinnacle of Tournament play; they're also a great place to start if you want to step directly into the championship arena. Playoffs are organized in single-elimination format, beginning with 8–16 clubs depending on how many teams you choose to control (1–8).

- ☐ League and Team selection in Playoff mode is identical to League mode. See *League Select Screen* on p. 16.
- ☐ Following Team selection, the Playoff Tree appears.

PLAYOFF TREE

The computer randomly seeds and pairs teams on the Playoff Tree. Once your teams are eliminated, your participation in the Playoff is over.

Control Pad ← → to scroll Playoff Tree

- To begin your next match, press **A** or **START**. The Controller Select screen appears. See *Controller Select Screen* below.

CONTROLLER SELECT SCREEN

At the Controller Select screen, you can choose the team you want to represent in the ensuing match, select a skill level for the players you control, and configure the complexity of your controller.

A controller icon appears for each controller connected to your N64. Up to four players can take part in a single *FIFA Soccer 64* match.

To choose a team, Control Pad ← → under the team's flag

To display on screen instructions, press C← or C→

Controllers not assigned to a team are computer-controlled during the match

- To highlight the current Skill Level or Control Set, Control Pad **↑↓**.
- To cycle Skill Level or Control Set choices, press **B**.
- To control players with the Control Stick, Control Stick in any direction. The Control Stick highlights on your controller icon.
- To control players with the Control Pad, Control Pad in any direction. The Control Pad highlights on your controller icon.

CONTROL SETS

FIFA Soccer 64 features two Control Set options: Simple and Complex. With the Simple control set you can perform basic football moves; the Complex control set lets you execute advanced skills. See the *Command Summary* on p. 4 for a detailed table of controls.

SKILL LEVELS

You can adjust your controller to suit your own personal skill level. In general, the Skill Level you select determines the measure of computer assistance applied to the players you control.

| | |
|-----------------|---|
| NOVICE | Full computer assistance allows even the newest rookie to play with ease. Passes invariably find teammates. Players enjoy a large zone of influence (this affects how close you must keep the ball to maintain possession). Headers and special moves occur frequently. |
| SEMI PRO | Computer assistance is greatly reduced when executing special moves (e.g., bicycle kicks, headers) and ball control. Passes still find their mark but take greater aiming precision. |
| PRO | No computer assistance. Players must work to keep control of the ball in a closer proximity or run the risk of having it stolen. All areas of gameplay require skilled precision. |

To begin the match:

- When each player chooses a team, press **A** or **START**. The players jog onto the pitch, and the Pre-Game menu appears.

PRE-GAME MENU

Use Pre-Game controls to fine tune the upcoming match. Team Management and Starting Lineup allow for precision control over your players, while Options and Controller Select let you return for eleventh hour adjustments.

- To select a Pre-Game menu item, Control Pad **↑↓** to highlight it, then press **A**.
- To march your players out to the pitch for the opening kick off, highlight **START MATCH** and press **A**, or press **START** with any item highlighted.

CAMERA

Select a Camera angle. You can play *FIFA Soccer 64* with any of eight different viewing perspectives. Each camera is mobile, focusing on the ball and following it throughout the match.

To select a Camera:

1. From the Pre-Game menu, choose **CAMERA**. The Camera menu appears.
2. Control Pad **↑↓** to highlight a Camera. The background adjusts to give you a preview.
3. When you find the Camera you want, press **START**. The Pre-Game menu appears.

Note: During the game, you can change the camera from the Pause menu. (See *Pause Menu* on p. 29.)

| | |
|---------------------|---|
| TELE CAM | This camera view is the closest to an actual television broadcast. The camera scrolls from side to side along with the action, and is set up high for a generous view of the pitch. |
| SIDELINE CAM | Another side-scrolling view, the Sideline Cam is set closer to the pitch, giving you the same perspective you'd have as a coach or reserve player standing on the sideline. |
| CABLE CAM | The Cable Cam tracks the game from top to bottom (net to net). Like the Tele Cam, it is further away from the field allowing you to observe as the plays take form. |

| | |
|---------------------|---|
| ENDZONE CAM | As its name might imply, the Endzone Cam is positioned in the endzone, directly behind the home team's net. This top to bottom camera view should be familiar to goalkeepers. |
| STADIUM CAM | An isometric, or diagonal-scrolling, camera. The Stadium Cam provides the most economical view, occupying the screen with as much of the playing field as possible. |
| SHOULDER CAM | The Shoulder Cam is a diagonal view, like the Stadium Cam, but it is set lower, allowing you to look over your players' shoulders. |
| BALL CAM | The most intimate of the seven views, the Ball Cam places you on the pitch. Although a spectacular view, the Ball Cam grants only limited vision of the field and your teammates. |
| FIFA 64 CAM | A combination of the Sideline and Ball Cams, with a touch of auto-zoom. This camera brings you right into the action and still allows for a great view of the field. |

PIP CAMERA

You can choose a different Camera for the Picture-in-Picture feature, giving you two perspectives on the game at the same time. All eight regular Cameras, plus Radar, are available for Picture-in-Picture.

| | |
|--------------|---|
| RADAR | Radar displays a full field overlay that displays the movement of every player on the pitch in real time. |
|--------------|---|

CONTROLLER SELECT

Reconfigure your controller setup. You can add newcomers, change skill levels, and toggle controller sets. See *Controller Select Screen* on p. 21.

TEAM MANAGEMENT

Access the Team Management screen to assume the role of coach before the match begins. Choose a strategy and formation, compose your lineup, and position each player in the precise area you want him to patrol. See *Team Management Screen* on p. 25.

OPTIONS

Many of the options accessible from the Options screen are available for last minute modifications.

- To adjust Options from the pitch, Controll Pad $\uparrow\downarrow$ to highlight an option, then $\leftarrow\rightarrow$ to cycle choices. For more information, see *Options* on p. 13.

QUIT

Quit the current game, and return to the Match Select screen.

TEAM MANAGEMENT SCREEN

Choose the Strategy and Formation you want your team to employ during the match. There are six formations and five strategies from which to choose. As you test out different combinations, a graphic representation of your team adjusts to demonstrate each.

Move highlight to activate

To navigate Team Management features:

1. Control Pad $\uparrow\downarrow$ to choose a Team Management feature.
2. Control Pad \rightarrow to activate the feature. (Follow the steps under the appropriate heading below for specific instructions.)
3. To exit, Control Pad \leftarrow to deactivate the feature, then press **START**. The Options menu appears.

When you're at the Team Management screen with the current feature inactive, you can move the pitch for a different perspective.

- Zoom in, press L + Control Pad ↓.
- Zoom out, press L + Control Pad ↑.
- Rotate left, press L + Control Pad ←.
- Rotate right, press L + Control Pad →.

TEAM FORMATION

Your Team Formation should cater to a combination of your team's strengths and weaknesses and your personal approach to the game. The lowest rated team in the league can surprise a powerhouse with an experienced skipper at the helm. The numbers denote Defenders–Midfielders–Forwards.

- To cycle formations, activate Team Formation, then Control Pad ↑↓.

- 4-4-2** Two forwards may seem a bit conservative, but if you couple the 4-4-2 formation with strong passing and wingplay, two may be all you need.
- 4-3-3** A good compliment to an offensive strategy. Play your midfielders and forwards together as a unit, and the battle for control of the passing lanes will be yours.
- 3-5-2** This versatile formation suits ALL-OUT OFFENCE and ALL-OUT DEFENCE equally well. Five midfielders quickly shift direction to create an eight player rush one moment and a seven player retreat the next.
- SWEeper** The Sweeper moves from side to side in the backfield, anticipating the play and striking wherever needed. With just two forwards, you can expect low scoring games for both squads.
- (1-3-4-2)**
- 4-2-4** The key to the 4-2-4 is stationing two tremendous athletes at midfield. Your midfielders run the transition game—passing the ball upfield and hustling back on defense.
- 4-5-1** Tailored to a strong defensive squad, this formation gets its strength from solid defense and speedy wingers who can take advantage of sudden opportunities.

TEAM STRATEGY

It is unwise to blindly develop a Team Strategy. Play with a team to uncover its strengths and weaknesses, then ask yourself some important questions: How does your team compare with your opponent defensively? Do your players possess the skills to score goals at will?

- To cycle strategies, activate Team Strategy, then Control Pad ↑↓.

ALL-OUT OFFENCE

When you gain possession of the ball, your players rush toward the opponent's goal to set up for a quick scoring chance. Turnovers are extremely risky with this strategy as your own net remains virtually defenseless.

ATTACK

Dominate your opponents on their own side of the turf. If you can initiate your plays from beyond the midfield line, you've already won half the battle. Keep the ball moving until you spot a clear scoring opportunity.

NORMAL

Your team adopts a reactive strategy and adjusts to whatever your opponent throws your way.

DEFEND

Focus on controlling the midfield area. Your opponent depends on clear passing routes in this area of the pitch; swarming defense cuts off passing options and causes turnovers, stopping offensive plays before they develop.

ALL-OUT DEFENCE

When your players find themselves on defense, rather than challenging the ball handler, they retreat deep into their own half of the field. If an attacker breaks into the penalty area, you've got the numbers to overwhelm him.

POSITION

When you're satisfied with your team's Formation and Strategy, use the Position feature to make minor adjustments to your players' field positions.

To modify field positions:

1. Activate Position and Control Pad $\uparrow\downarrow$ to move the highlight to the desired player position.
 2. When the position you want is highlighted, press **B** to unlock the position, then Control Pad in any direction to adjust.
 3. When you're satisfied with the position, press **B** again to lock.
- Continue with other positions in the same manner.

STARTING LINEUP

Teams begin each match with a Starting Lineup of 10 players and a goalie positioned on the pitch. The remaining athletes on the roster are reserves. You can use reserve players to substitute for fatigued players or to replace injured and suspended teammates.

Reserve players' names appear in purple on the roster

Starting Lineup Overlay

To change your starting lineup:

1. Activate Starting Lineup and Control Pad $\uparrow\downarrow$ to move the highlight to the player you want to remove from the lineup.
2. Press **B**. The player's name appears in the Starting Lineup overlay.
3. Highlight the player you want to replace him with, and press **B**. The word "Swap" appears.

4. Press **B** again. The players swap positions.
 - To cancel a change, press **C** ← before confirming the swap.
 - Repeat until you are satisfied with your Starting Lineup.
5. Upon exit, you are prompted to accept or cancel your changes. Highlight your choice, then press **B**.
 - ☐ You can further change your lineup by swapping positions between two starting players, giving your team a different look on the pitch.
 - ☐ Forwards, Midfielders, and Defenders are not restricted by their natural positions; however, Goalkeepers must play in the net.

SUBSTITUTION

During the match, the Substitution feature replaces Starting Lineup. Substitution options depend on the Game Type you select at the Options screen. If you chose **SIMULATION**, you are limited to three Substitutions throughout the match. If you chose **ACTION** or **ARCADE**, no such restrictions exist.

- ☐ Substitutions work in the same manner as Starting Lineup changes. For information, see *Starting Lineup* on p. 28.

PAUSE MENU

The Pause menu contains many of the same items as the Pre-Game menu, along with the following options specific to the current game. For more information, see *Pre-Game Menu* on p. 23.

- To pause the match, press **START**. The Pause menu appears.
- To resume play, highlight **RESUME GAME** and press **A**, or press **START** with any item highlighted.

INSTANT REPLAY

Exceptional plays are worth a second look and many times a third or a fourth as well. When you want to replay the action, choose INSTANT REPLAY, then step into the editing room and roll the tape.

Frame Indicator

- To play, press and release **A**.
- To pause, press and release **A** again.
- To advance frame-by-frame, tap **A** repeatedly.
- To fast-forward, Control Pad **→**.
- To rewind, Control Pad **←**.
- To scroll camera views, press **C↑/C↓**.

Free Cam Controls:

- To select the Free Cam, **C↓** to FREE CAM.
- To rotate the Free Cam, press **L** or **Z** + Control Pad **←→**.
- To tilt the Free Cam, press **L** or **Z** + Control Pad **↓↑**.
- To move the Free Cam In/Out, press **R** + Control Pad **←→**.
- To zoom In/Out, press **R** + Control Pad **↓↑**.

GAME STATISTICS

Compare the two squads in eight statistical categories: Score, Saves, Fouls, Shots on Goal, Corner Kicks, and time of possession Attacking, In Midfield, and Defending.

SCORE SUMMARY

Check the summary of all goals scored during the match. Find out who scored, at what time, and for which team.

FOUL SUMMARY

Check the summary of all fouls committed during the match. The Foul Summary screen tracks each rogue player's name, team name, and the time of the foul.

Note: You can press **C←/C→** to cycle the Game Statistics, Score Summary, and Foul Summary screens for quick viewing.

SAVING AND RESTORING

If you have a Controller Pak connected to one of your controllers, you can save your Season, Tournament, and Playoff progress after the last completed game and continue at a later time.

To save your progress:

1. At the End Game menu following a Season, Tournament, or Playoff match, choose the CONTINUE option. The Save screen appears.
2. Choose CONTROLLER PAK, then choose the Controller Pak to which you want to save. The computer saves your game data.

To restore your game:

1. At the Match Select screen, choose RESTORE. The Restore screen appears.
2. Choose CONTROLLER PAK, then choose the Controller Pak from which you want to restore. Your Season, Tournament, or Playoff is restored.
